## EXPERIENCE

### **Celebal Technologies** — *Associate Data Engineer*

Jan 2020 - May 2020

Made a machine learning model on Real-Time Demand Forecasting, using Pyspark framework with Databricks and Microsoft Azure.

### **Ducat** — *Project Intern*

May 2019 - June 2019

Built an age and gender prediction model on Machine Learning with the help of OpenCv and TensorFlow.

Gathered and predicted models on various datasets.

## EDUCATION

### **Manipal University Jaipur, Jaipur** — *B.Tech.*

June 2017 - June 2021

## PROJECTS

### **Demand Forecasting** — *ML, Pyspark, PowerBI, Azure*

This Project uses MLlib to help enterprises predict sales and even get a detailed analysis of their ongoing sales paradigm with the help of a BI tool.

### **Predicting Age and Gender Using OpenCV** — *ML*

This Project uses a Wide Residual Network and opens a real time web cam through which the Network determines the Age and Gender of the person

### **Stock Market Prediction Using LSTM** — *ML*

This Project picks out the Trend in Stock Market and predicts the further ups and downs of the upcoming trend

## SKILLS

Machine Learning

Python and C++ proficiency

Power BI

Game Development in Unity

Budgeting and finance.

Team Leadership

## CERTIFICATIONS

Machine Learning

Databases

Python

Unity

## HONOR & AWARDS

Won Third Prize in MUJ  
Entrepreneurial Innovation  
Challenge

## LANGUAGES

English

Hindi

French  
(Elementary Proficiency )
